

New from PMI, LLC...

***PMI VisitCoder*®**

Now your staff can choose office visit codes accurately and quickly by simply reviewing key data in the patient's record and entering a few numbers into the PMI VisitCoder® fully functioning computer spreadsheet.

Every code choice will be based on the national rules for choosing codes; Current Procedural Terminology (©American Medical Association) and the Documentation Guidelines for the Evaluation and Management Services.

Doctors can let staff choose codes, just like in large clinics and hospitals, and get back to concentrating on patient care.

*This great service can be yours for just \$195** if you act now. You will receive the computer file for PMI VisitCoder® and all the tools you'll need to put it to work for you, including:*

- Detailed instructions*
- Free access for doctors and staff to the PMI online course for choosing codes (Normally \$125)*
- Copies of PMI's medical record and case history forms to assist offices in redesigning their own forms*
- Email access to PMI personnel for assistance during the training process*

Questions? Contact Dr. Chuck Brownlow (brownlowod@aol.com) or Joyce Josie (joycepmi@aol.com)

<p>**Note: The VisitCoder® package will be offered nationally for \$495 later in 2009. This is an introductory offer only!</p>
